Montpellier, June 27th 2022

To whom it may concern,

I certify that Ikore International Development Limited, based in Abuja, Nigeria, is a fully-funded partner of the project "EU Support to Livestock Disease Surveillance Knowledge Integration (LIDISKI)", financed by the European Union within the frame of the Development of Smart Innovation through Research in Agriculture (deSIRa) initiative.

Within the LIDISKI project, Ikore is in charge of multiple activities in sites targeted by the project in Plateau, Bauchi and Kano states, Nigeria. Their activities concern (1) baseline assessment of Community Animal Health Workers (CAHWs) to establish their knowledge and skills level, (2) organising training of CAHWs, and (3) training of trainers (ToT) following the curriculum certified by the Veterinary Council of Nigeria (VCN). Ikore has great experience in such activities and an extended and very useful network of contacts among public, private and international organisations involved in CAHWs and ToT activities in Nigeria. They ensure the quality and sustainability of the training and capacity building within communities, with the full appreciation of VCN, the partners of the LIDISKI project and its stakeholders.

Ikore is also in charge of (4) advocacy work towards communities and (5) communication on the progress of the project towards stakeholders. The Ikore team proved to be very efficient and creative in these tasks, producing high-quality material and disseminating it using multiple channels of communication adapted to a variety of public targets.

Do not hesitate to contact me if you need further information.

Yours Sincerely,

Arnaud Bataille
Coordinator of the LIDISKI project
